STUDENT PERFORMANCE ANALYSIS

MS Excel Project Documentation

Name – Deepa

Question No. 1

Aim:

Create an Excel workbook to analyse 15 students' performance. Create a dataset containing Student Name, Mathematics, Science, English, Computer Science, and Attendance Percentage. Add columns for Total Marks, Average Marks, and Result. Calculate Total Marks and Average Marks using formulas, and use an IF formula to display Pass or Fail. Calculate the highest total, lowest total, and class average. Apply conditional formatting to highlight averages above 75 and failed students. Sort the students based on Total Marks and apply filters. Create a column chart showing Student Name and Total Marks. The workbook should contain two worksheets named Student Data and Analysis.

Objective: To analyse the performance of 15 students using Microsoft Excel by calculating total marks, average marks and results, and presenting the data using charts and analysis tools.

Hardware Requirements

- Computer/ Laptop
- Keyboard and Mouse
- Internet connection

Software Requirements

- Operating System: Windows / Linux / macOS
- MySQL Server (Version 8.0 or above)
- MySQL Command Line Client or MySQL Workbench

Procedure / Steps

1. Create the Student Table

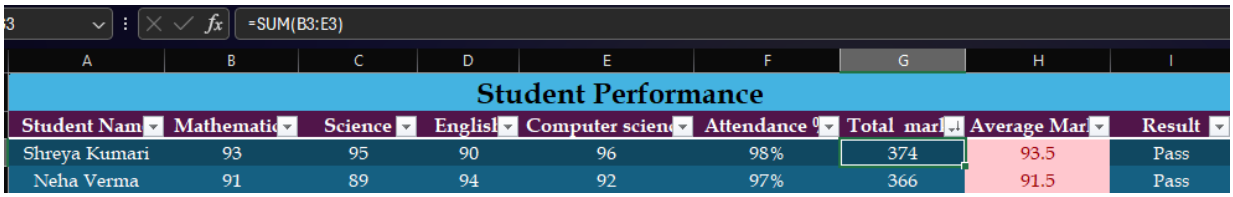

Create a database of 15 students with Marks, Attendance, Total, Average, and Results.

Student Performance								
Student Nam	Mathematic	Science	Englisl	Computer scien	Attendance %	Total marl	Average Mar	Result
Shreya Kumari	93	95	90	96	98%	374	93.5	Pass
Neha Verma	91	89	94	92	97%	366	91.5	Pass
Sneha Patel	88	84	86	91	93%	349	87.25	Pass
Ananya Sharma	85	78	82	90	95%	335	83.75	Pass
Kajal Sharma	82	79	85	88	94%	334	83.5	Pass
Simran Khan	78	81	76	85	90%	320	80	Pass
Priya Singh	72	68	75	80	88%	295	73.75	Pass
Muskan Verma	67	73	69	75	85%	284	71	Pass
Riya Gupta	65	72	68	70	82%	275	68.75	Pass
Pooja Yadav	55	60	58	62	76%	235	58.75	Pass
Tanya Singh	52	48	55	60	74%	215	53.75	Pass
Aditi Mishra	45	52	48	50	71%	195	48.75	Pass
Komal Singh	38	42	45	40	68%	165	41.25	Pass
Nisha Gupta	30	35	32	28	62%	125	31.25	Fail
Isha Tiwari	25	32	28	35	59%	120	30	Fail

2. **Apply Formulas**: Use formulas to calculate Total Marks, Average Marks, and Result,

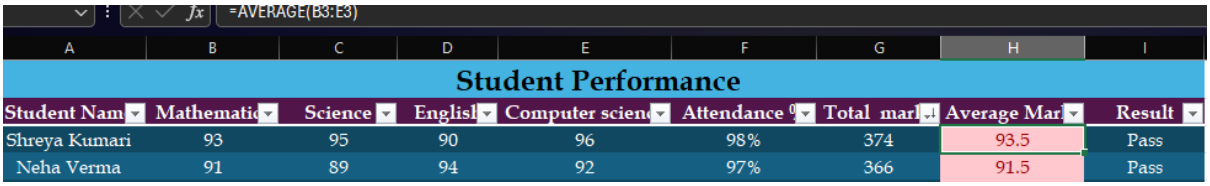

1. Total marks:

Use the SUM function to calculate the total marks each student obtained in four subjects.

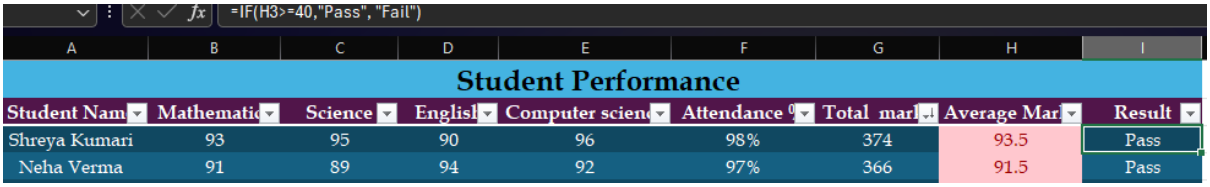

2. Average Marks:

The AVERAGE function is used to calculate the average marks obtained by each student

3. **Result:**

The IF function is used to determine whether a student has passed or failed based on the average marks.

=IF(H3>=40,"Pass", "Fail")

A	B	C	D	E	F	G	H	I
Student Performance								
Student Nam	Mathematic	Science	Englisl	Computer scien	Attendance %	Total marl	Average Mar	Result
Shreya Kumari	93	95	90	96	98%	374	93.5	Pass
Neha Verma	91	89	94	92	97%	366	91.5	Pass

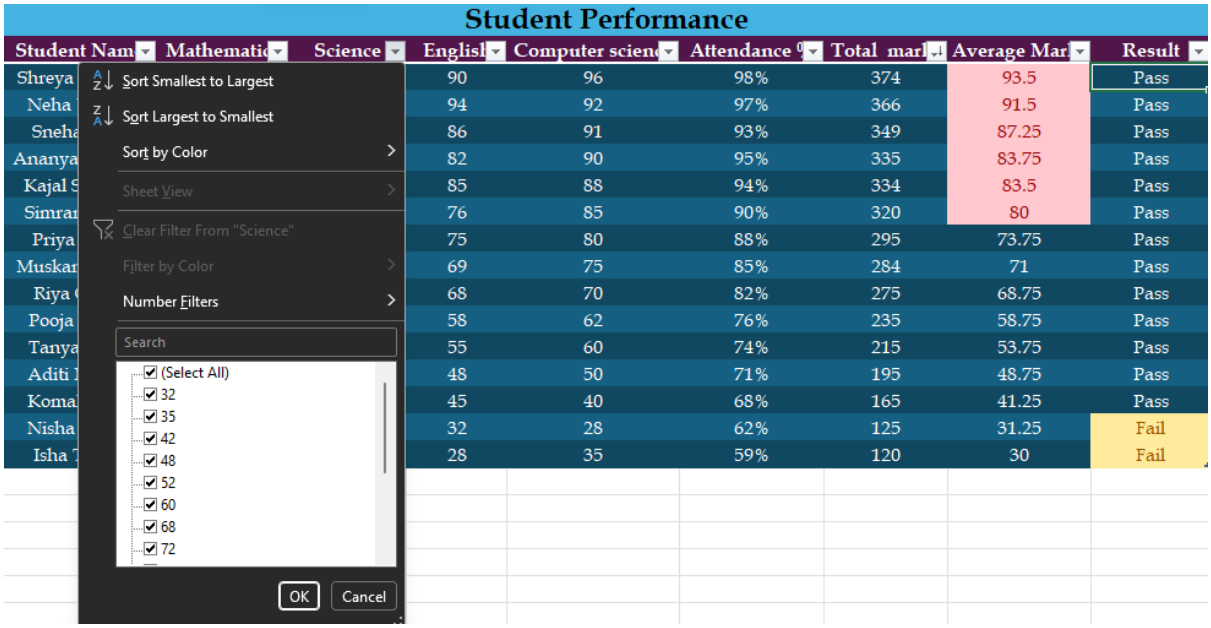

4. **Create Conditional Formatting:**

Highlight the average above 75 and Failed Students**.**

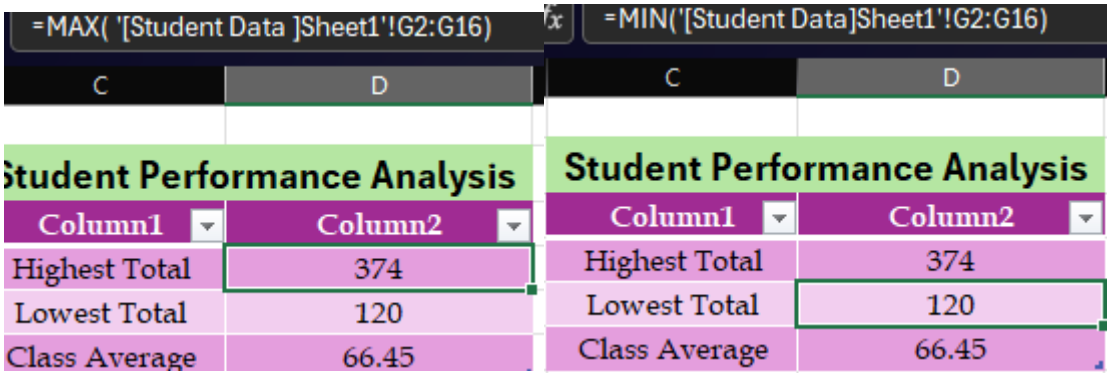

Average Mar	Result
93.5	Pass
91.5	Pass
87.25	Pass
83.75	Pass
83.5	Pass
80	Pass
73.75	Pass
71	Pass
68.75	Pass
58.75	Pass
53.75	Pass
48.75	Pass
41.25	Pass
31.25	Fail
30	Fail

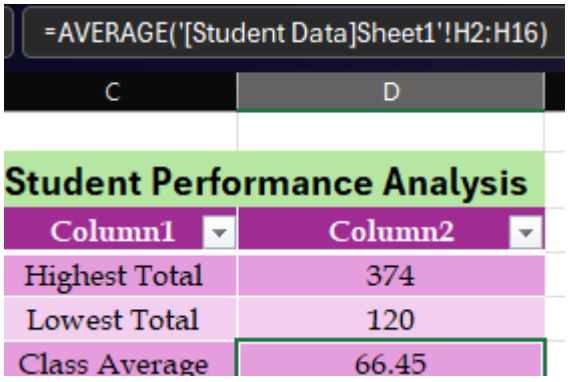

5. **Sort & Filter Data**:

Sorted students by Mathematics marks and applied filters.

6. **Analysis Sheet:** Calculated Highest Total, Lowest Total and Class Average**.**

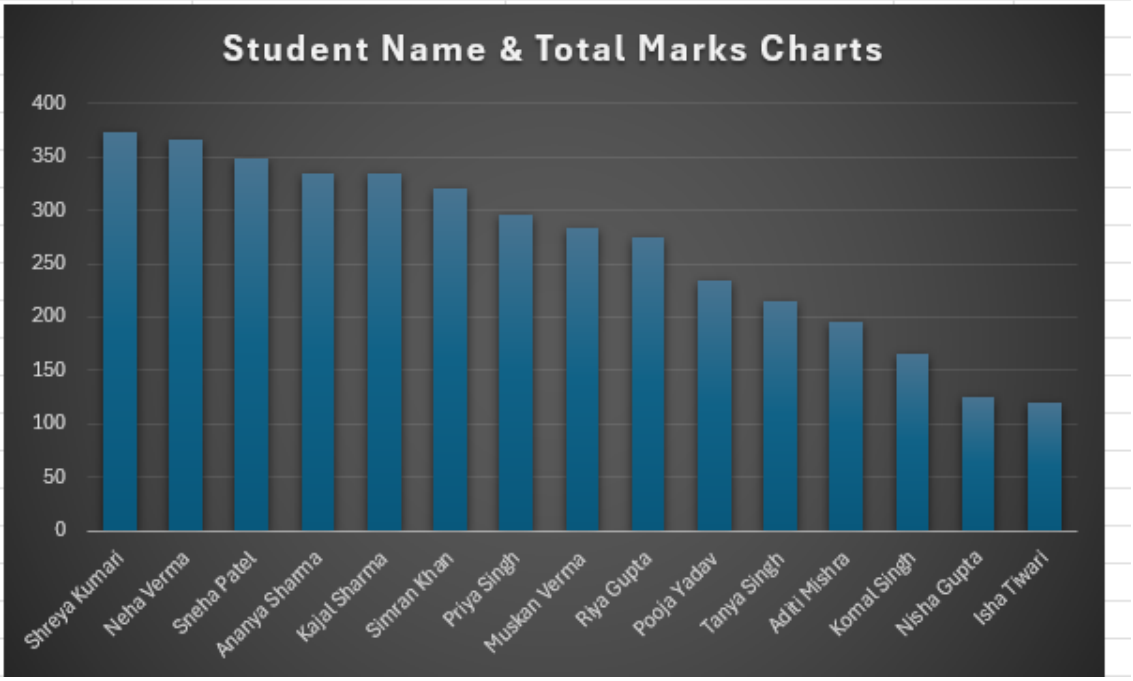

The analysis sheet provides a quick summary of student performance and makes it easier to understand the overall academic performance.

7. **Create Pivot Chart & Pivot Table**:
   Created a Pivot Table and Column PivotChart to analyse students' total Marks**.**

Student Performance Analysis	
Column1	Column2
Highest Total	374
Lowest Total	120
Class Average	66.45

Result: Student performance was successfully analysed using Microsoft Excel.

CYBER SAFETY FOR STUDENT

PowerPoint Project Documentation

Question No. 2

Aim:

Create a 10-slide PowerPoint presentation on “Cyber Safety for Students.” The presentation should include a title slide, introduction, common cyber threats, phishing and online scams, password security, social media safety, safe internet browsing, a real-life scenario, safety checklist, and conclusion. Include at least 5 relevant images or icons, one table, one SmartArt graphic, and one diagram using shapes. Use at least two different slide layouts. Apply a consistent theme, transitions to all slides, animations to at least three slides, and speaker notes to three slides.

Cyber safety is important for students because they use the internet for learning, communication and entertainment. Cyber safety means protecting ourselves while using digital devices and the internet. Unsafe online activities can cause scams, data theft and privacy problems. This presentation explains common cyber threats and safe practices that students should follow while using the internet.

❖ Objective:

To understand the importance of cyber safety. To identify common cyber threats.To learn how to protect passwords and OTPs. To use social media safely. To browse the internet safely. To identify suspicious messages and links. To encourage safe and responsible online behaviour.

❖ Hardware Requirements

- Computer/Laptop
- Keyboard
- Mouse
- Monitor
- Internet Connection

❖ Software Requirements

- Microsoft Windows
- Microsoft PowerPoint
- Microsoft Word
- Internet Browser

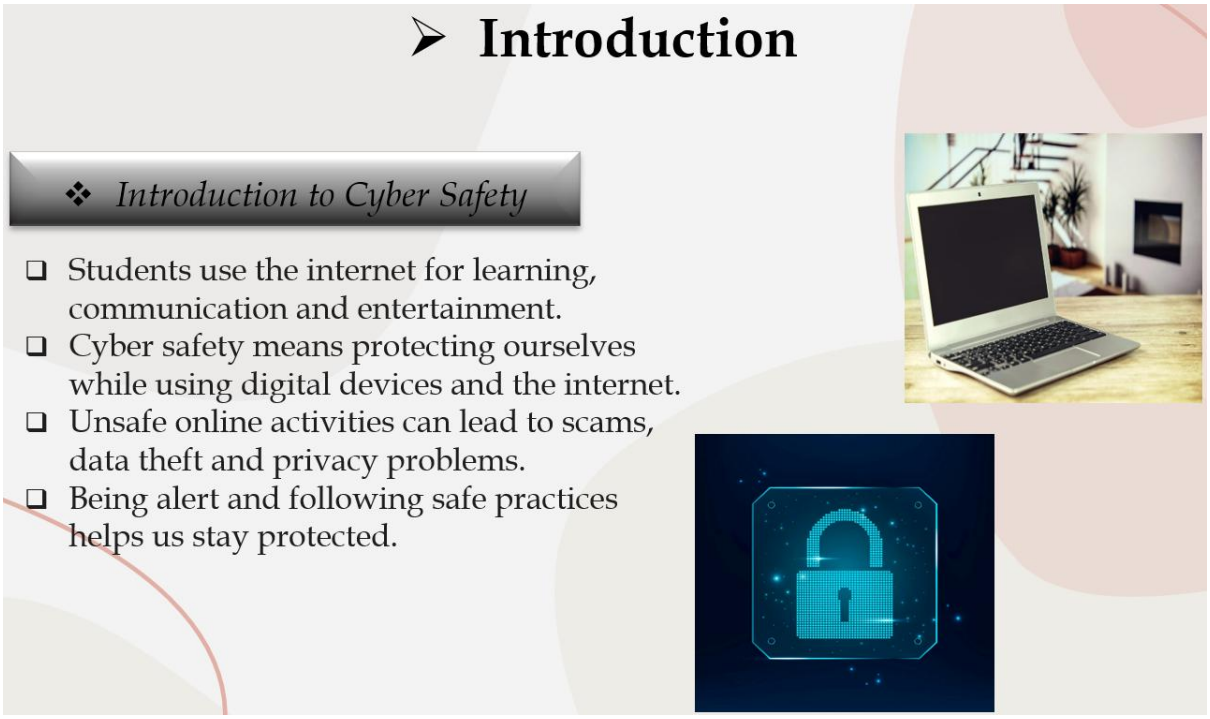

❖ Procedure:

1. Create Title:

2. Introduction:

- Students use the internet for learning, communication and entertainment. Cyber safety means protecting ourselves while using digital devices and the internet.
- Unsafe online activities can lead to scams, data theft and privacy problems. Being alert and following safe practices helps students stay protected.

3. Common Cyber Threats:

- Phishing: Fake emails, messages and login pages designed to obtain information.
- Online Scams: Fake prizes, offers, job opportunities and payment requests.

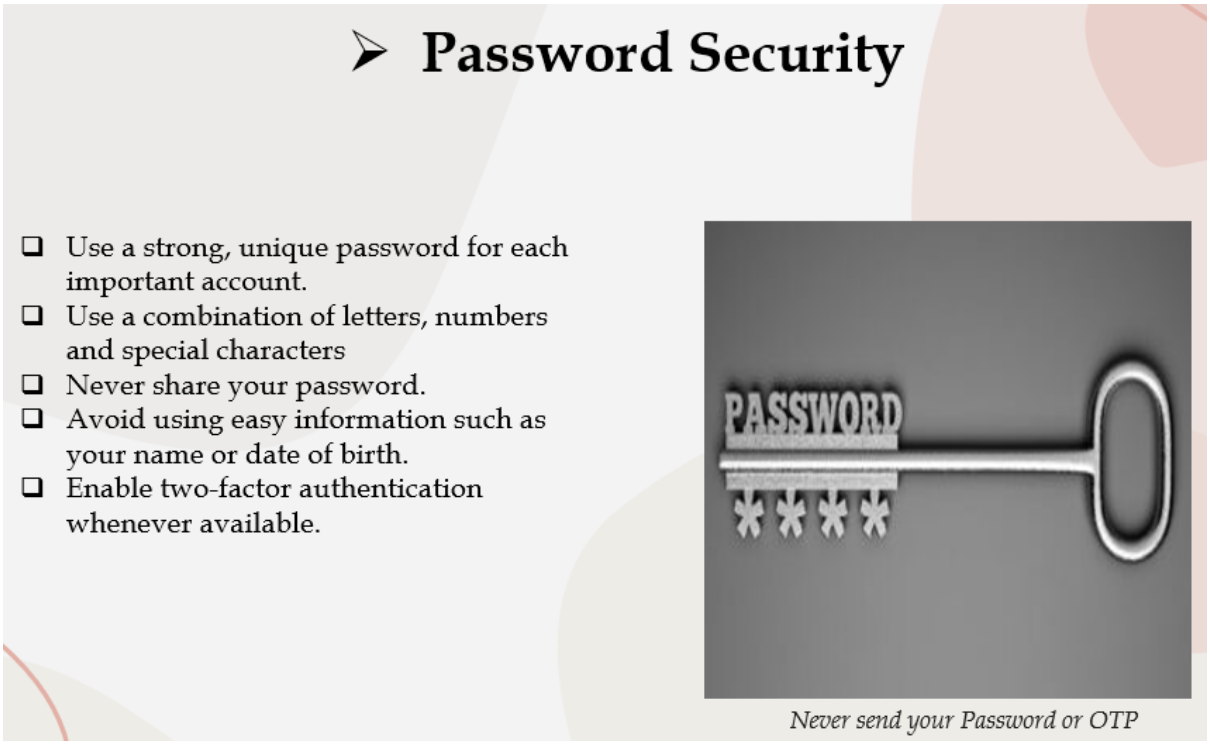

4. Phishing & Online Scams:

- Fake emails and messages
- Fake login pages
- Suspicious links
- Requests for passwords or OTP
- Fake offers
- Fake prizes

5. Password Security:

- Use a strong and unique password for each important account.
- Use a combination of letters, numbers and special characters.
- Never share your password.

6. **Social Media Safety:** Block and report suspicious or abusive accounts. Do not share your live location unnecessarily.

7. **Safe Internet Browsing**:

- Verify links before clicking.
- Protect your personal information.
- Log out safely after using an account.

8. **Real-Life Scenario**:

A student receives a suspicious message saying, “Congratulations! You have won a prize.” The message asks the student to click a link and enter account details.

9. **Cyber Safety Checklist**:

➢ Cyber Safety Checklist

Saftey Practice	Yes/No
I use strong password	Yes/No
I never share OTP	Yes/No
I check suspicious link	Yes/NO
I use trusted websites	Yes/No
I keep my accounts private	Yes/No

10. **Conclusion & Thank You :**

- Cyber safety is important for every student who uses digital devices and the internet. Students should think before clicking links, protect their passwords and personal information, use social media responsibly and browse trusted websites.
- Suspicious online activities should be reported. Following safe online practices helps students stay alert, safe and secure.

➢ Conclusion & Thank You

Stay Alert, Stay Safe, Stay Secure

- ❑ Think before you click.
- ❑ Protect your passwords and personal information,
- ❑ Use social media responsibly.
- ❑ Browse trusted websites.
- ❑ Report suspicious online activities.

Thank You
